

# CAR PARK FLOORING SYSTEM

## DESCRIPTION

High performance, slip resistant multi-layer system based on solvent free epoxy resin and selected graded aggregate with anti-skid properties designed for vehicular traffic. Applied thickness 1-3mm.

## BENEFITS

- Aesthetically attractive  
*Wide range of distinctive colours to brighten up dull areas. Thus enhance visual appearance and improve light reflectivity.*
- Chemical resistance  
*Provide excellent resistance towards penetrating oil, petrol, engine oil and liquids especially in laboratories, workshops and car parks.*
- Excellent bond strength and abrasion resistance  
*Withstand roller wheel traffic which cause great cyclic impact and hard wearing on the floor.*
- Slip resistance  
*Safety especially in wet markets, kitchen, cafeterias with oily areas, slippery surface and hard cornering areas.*

## RECOMMENDED USES

- Car park deck, multi storey car park and workshop.
- Ideal for wet commercial, institutional and industrial application.

## COLOURS

Available in standard flooring colours. Other colours can be matched upon request.
